RADIO RECEPTION
CONFIRMATION REPORT

DATE: 8/1/86

DEAR Bill Burrows

WE ARE PLEASED TO BE IN RECEIPT OF YOUR RECEPTION REPORT ON OUR STATION. YOU ARE ONE OF MANY IN YOUR GENERAL AREA WHO HAVE REPORTED RECEIVING OUR SIGNAL.

AM 1510 WMRE is owned by Mariner Communications and licensed for 50 kilowatts, 24 hours per day operation. Our transmitter is a Harris MW-50B and is located in Waltham, Massachusetts, approx. 6 miles from our offices and studios, which are located in the Fenway Park building, home of the Red Sox baseball team, in Boston.

We operate at an assigned frequency of 1510 kHz., with a two-tower directional pattern during the day, and a four-tower directional pattern at night.

Because our signal direction is restricted, WMRE is aimed primarily eastward during our night hours of operation. That, and the 'skip' properties of the ocean, means we are often heard by points across the Atlantic.

WMRE, formerly WITS and WMEX before, is also known as The Memory Station. We are programmed with nostalgia music from the 20's through the present, sports talk shows, and trivia game shows. Some of our music programming originates in Chicago, Illinois, and is sent to us via satellite.

Thank you for taking the time to report your reception, and we here at WMRE hope you have heard enough of our programming to enjoy our offerings.

Sincerely,

Mark Bastoni
